Subject : Material IPM 4900 and Regulation 1935/2004/EU			Date	Pages	
			25 th Sept. 2012	1 of 1	

The present to declare that a specific test to verify the compliance of material IPM 4900 to the regulation 1935/2004/EU has never been performed, but due to the fact that a material with a similar composition (PTFE + silicate filler) called PTFE G405 has been positively checked (see Test Report No. 0240/FPM/FDC/11-10 dated 12th April 2011) a compliance of IPM 4900 could be “derived”.

Best regards

Marco Nocera
